You have read the following post on a blog about common stereotypes of engineers and engineering.

---

the creative engineer
08:26am

I suppose we have all been there before. You tell someone you are an engineer and they come up with this list of stereotypes:

- Engineers have no soft skills.
- The only thing they are interested in is their field of engineering.
- Engineers are not creative.
- Their work is boring.

I don't know about you, but I'm tired of these stereotypes. What do you think?

You have decided to comment on this blog post.

In your **comment** you should:

- ■ compare these stereotypes to your experiences of engineers
- ■ explain which soft skills are important in your field of engineering
- ■ consider requirements for engineers in the future

Write around **250 words**.
